

Turbocharger Cleaner®

'ALL SEASON APPLICATION'

DESIGNED FOR DIESEL ENGINES

All season application to reduce accumulation of carbon, soot, and frees sticking vanes in turbochargers.

4+ Turbocharger Cleaner is designed to reduce turbocharger replacement and to maintain performance.

WHAT IT DOES:

- Helps to release sticking turbochargers vanes
- Assists in freeing up sticking actuators
- Removes carbon and other deposits from upper cylinders and turbochargers
- Reduces chances of expensive turbocharger replacement

WHEN TO USE:

- When installing replacement turbocharger
- When fault codes related to actuators are experienced
- Monthly as preventative measure
- Not for use in gasoline engines

HOW MUCH TO APPLY:

- Add contents to 500L of diesel fuel
- Add to diesel fuel tank
- For extreme conditions remove and fill fuel filters with product
- Add remainder to 100L of diesel fuel

Certified Compliant for use in Low Emission Engines & ULSD Fuel.

NO HARM GUARANTEE

(Chemical components in the product will not harm fuel injection system or engine)
